

## Save time returning at The Beer Store

- 1 Transfer your loose containers from your plastic bags into our tote bins.
- 2 Use refillable boxes for easy storage and return of containers.
- 3 Return containers during off-peak hours. Ask the staff at your local store for suggestions.
- 4 Sort containers by like sizes and container types.
- 5 Returning a large number of containers? Contact your local store to arrange a drop-off time so we can serve you more efficiently.

Thank you for doing your part.

## Environmental Success

The deposit return program results in a higher rate of diversion to landfill than curb side collection.

Higher collection rates through The Beer Store means more containers are being processed to their highest possible end use – saving both landfill space and reducing the amount of energy needed to create new products.

More space is freed up in Blue Boxes helping municipalities recover other materials.

Nearly 200 million wine and spirit containers have already been diverted from landfills.

The program is on track for meeting all of its goals in the first year.

The Beer Store has a long standing record of deposit return success and annually recovers 99% of all standard beer containers sold in Ontario.
